Department of Health- Vaccine Purchasing Act (VPA)	140,000	Multiple providers. Each provider orders direct from the drug manufacturer (ie: Merck, Pfizer, GlaxoSmithKline, etc.) off the CDC contracted prices for the purpose of the VPA program.	3/31/2020	Funded by statewide healthcare payers (health plans) with covered children; each health plan is prospectively billed annually by DOH for its entity's share of covered childrens' lives, whether the plan's children are vaccinated or not. For the health plan to be billed the VPA price, parents must take kids to a participating "Vaccines for Children" provider. If the parents choose not to use a participating provider and use providers like CVS, Walgreens, Albertsons, etc., to vaccinate their children, then the health plan will pay for these providers in addition to the vaccine payment through the VPA program.
